syekhanmaulana066@gmail.com | +62 858-9573-4735 | linkedin.com/in/syekhanmaulana

Pasuruan, Jawa Timur, Indonesia

PROFILE

Undergraduate Student in Bachelor of Applied Manufacturing Engineering Technology at Universitas Negeri Malang, currently in the 7 semester with a GPA of 3.89/4.00. I consider that i am a person who likes learning new things, has a strong analytical mind, can work with a team, communicative, and is willing to improve my self development skills and can be given responsibility.

EDUCATION

Universitas Negeri Malang | *Bachelor of Applied in Manufacturing Engineering Technology* **August 2023 - Current**

- GPA 3.89/4.00

- **Achievements**

- Participant in Student Outbound Mobility Program at Universiti Teknologi MARA, Malaysia (2024), focusing on Artificial Intelligence and Machine Learning.
- 3rd Place in Business Plan Competition, issued by Faculty of Vocational Studies, Universitas Negeri Malang, 2025.
- Finalist of ANCHOR (Annual Competition of Naval Architecture), issued by Faculty of Engineering, Universitas Negeri Jember, 2025
- 3rd Place in Sustainable Innovative Product Category, issued by Competition Committee of Universitas Sebelas Maret, 2025
- Participant in Global Leadership and Community Service Program at Management and Science University, Malaysia (2025).
- Participant in Academic Exchange and Cross Cultural Program at National Dong Hwa University, Taiwan (2026).

WORK EXPERIENCE

Pipping Engineer – Internship Project LPD Al - Maryah Ship | PT PAL (Persero) **January - May 2026**

- Successfully executed end to end fabrication and testing of GRE (Glass Reinforced Epoxy) piping systems for the LPD Al Maryah vessel, from material identification to hydrotesting, in full compliance with project quality standards.
- Improved material utilization efficiency through accurate calculation of pipe and fitting requirements, minimizing waste during the fabrication process.
- Ensured successful hydrotesting of fabricated piping systems with zero leakage, meeting all technical specifications and quality requirements.
- Supported project timeline achievement by ensuring material readiness and controlled fabrication progress through effective coordination with the PPC team.
- Contributed to smooth fabrication workflow by maintaining accurate documentation and tracking of completed piping systems for quality control and reporting purposes.

Logistic Planning Staff - Full Time | PT Astra Daihatsu Motor **November 2021 - Auguts 2023**

- Plan Material and non material inventory requirements based on production planning, user request & production schedule.
- Forecast calculation for Local Source Part, Consumable item, Component Export and BBM is accurate.
- Maintaining orders (PO Creation, Follow Up Approval PO, Monitoring Delivery at SAP) are monitored and followed up on time.
- Monitor existing inventory using an inventory management system to ensure that area no shortage on excess inventory.
- Ordering calculation & JIT (Daily Planning & Order for Local Source Part, Control stock daily order, Stock Taking Opname).
- Person In Charge Quality Control Circle, Internal Audit & I-CARE area Departement.
- Data Analysis and Data Visualization using Microsoft Excel and Microsoft Power BI.
- Developed and maintained Power BI reports and dashboards to monitor and analyze key manufacturing metrics.
- Designed a Stock Accumulation Unit dashboard comparing plan vs actual to support production planning decisions.
- 1st Place in Internal QCC Division, issued by Company Committee, 2021 – Project: “Reducing Lead Time Process for Special Order Manufacturing”.
- 3rd Place in Quality Control Circle (QCC) Initiative, issued by Company Committee, 2023 – Project: “Make ADM as Smart and Green Manufacturing”.

Quality Assurance - Internship | PT Indolakto

January - March 2020

- Perform laboratory tests to detect contaminants and ensure compliance with health standard.
- Investigate the factors that cause clumping and find solutions to improve product durability.
- Collect and analyze dairy product samples to ensure quality and safety.
- Inspect and verify raw materials to ensure conformity with company quality specifications before production.

ORGANIZATIONAL EXPERIENCE

Head of Creative Innovation Division | Student Executive Board of FV UM

January - December 2025

- Created and proposed the new “Youth Entrepreneur Show” program, which was later implemented as an innovative initiative to support youth entrepreneurship development within the Vocational Faculty.
- Coordinated cross division collaboration (media, publication, and events) to execute innovative ideas that increased participation and activity exposure.
- Contributed to innovative decision making and strategic planning to support long term organizational development.
- Analyzed trends in creativity, technology, and innovation, then implemented them to amplify program impact and create more interactive experiences.
- Led and supervised departmental projects that enhanced organizational visibility, participant engagement, and community growth.

Project Director | International Design Competition (IDC), VOCASPIRA FEST 2025 of FV UM

May 2025

- Led the full planning, coordination, and execution of an international design competition, ensuring all event stages were delivered on schedule, well structured, and aligned with the established plan.
- Coordinated cross division collaboration (event management, logistics, publication, and sponsorship) to optimize workflows and ensure operational, promotional, and technical needs were met effectively.
- Managed coordination meetings and routine monitoring to maintain committee progress and resolve technical and on site challenges efficiently with practical solutions.
- Held responsibility for overall event outcomes, including participant growth, smooth implementation, and enhanced program branding through exposure and engagement from international institutions.

Logistic Staff | Vocational Inter Cultural Camp of FV UM

November 2024

- Coordinated the preparation and distribution of logistical needs including event equipment, participant kits, and venue setup which supported the successful execution of multiple intercultural activities with high participant satisfaction.
- Ensured seamless transportation, accommodation, and catering logistics for local and international participants, contributing to a smooth event flow and positive attendee experience.
- Collaborated with cross functional divisions to maintain accurate inventory tracking and optimize budget allocation, reducing logistical inefficiencies and preventing resource shortages.
- Assisted in monitoring event timelines and on site logistics, helping ensure that multicultural workshops and performances were delivered on schedule and without operational disruptions.

LICENSE & CERTIFICATION

Artificial Intelligence and Machine Learning Short Course | MLRG's Academy of UITM Malaysia

October 2023

- Learned core concepts of Artificial Intelligence and Machine Learning, including supervised, unsupervised, and deep learning techniques.
- Implemented ML algorithms such as regression, classification, and clustering using Python, Scikit learn, and TensorFlow.
- Applied data preprocessing, model evaluation, and improvement methods in practical projects.
- Completed a capstone project applying AI and ML to real world problems with consideration of ethical and social impacts.
- Developing a real time object detection system using computer vision and camera based models, applying AI techniques to accurately identify and track multiple objects.

SKILL & LANGUAGES

Language : Indonesian (Native) , English (Pre Advance).

Hard Skills : SAP ERP, Supply Chain, Ordering Management, Machine Learning & AI, Production & Inventory Control, Microsoft Office (Excel VBA, Power Query), Data Visualization (Power BI).

Soft Skills : Agile, Eagerness to learn, Communicative, Analytical thinking, Leadership, Intrapersonal Skill, Time Management.

SYEKHAN MAULANA

Undergraduate Manufacturing Engineering Technology

UNIVERSITAS NEGERI MALANG

Passionate about Production Planning & Inventory Control, Supply Chain, Logistic Planning, Ordering Management, Power BI, Machine Learning, SAP ERP, Microsoft Office (Excel VBA, Power Query), Material Science, Piping Engineer

PROJECT PORTFOLIO

PROJECT RESEARCH

Research Assistant Of Specialist Material Science

Application of Machine Learning Based Predictive Models for Optimizing Natural Fiber Composition and Orientation in Environmentally Friendly Composite Manufacturing Processes

Assisted in material research processes through mechanical property testing such as tensile strength, hardness, heat resistance, and microstructure analysis. Responsible for sample preparation, data processing, basic analysis, and supporting the preparation of research reports, journals.

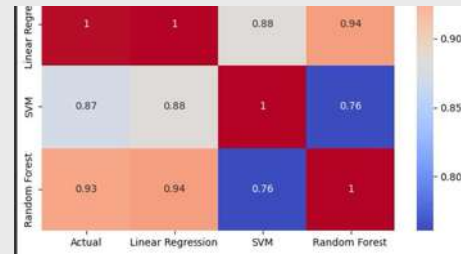

Material Preparation

Test Sample

Tensile Strenght

Data Processing & Machine Learning

Optimizing the Addition of Coffee Bean Waste and Teak Leaf Dyeing for Sustainable Textiles with Mechanical and Antibacterial Properties Based on Nature

Responsible for the research process of sustainable textiles based on coffee bean and teak leaf waste, including material preparation, mechanical and antibacterial property testing, analysis of research data, and preparation of research reports and documentation.

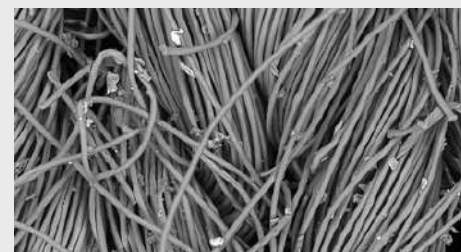

Sample Preparation

Mixing Variable

antibacterial test

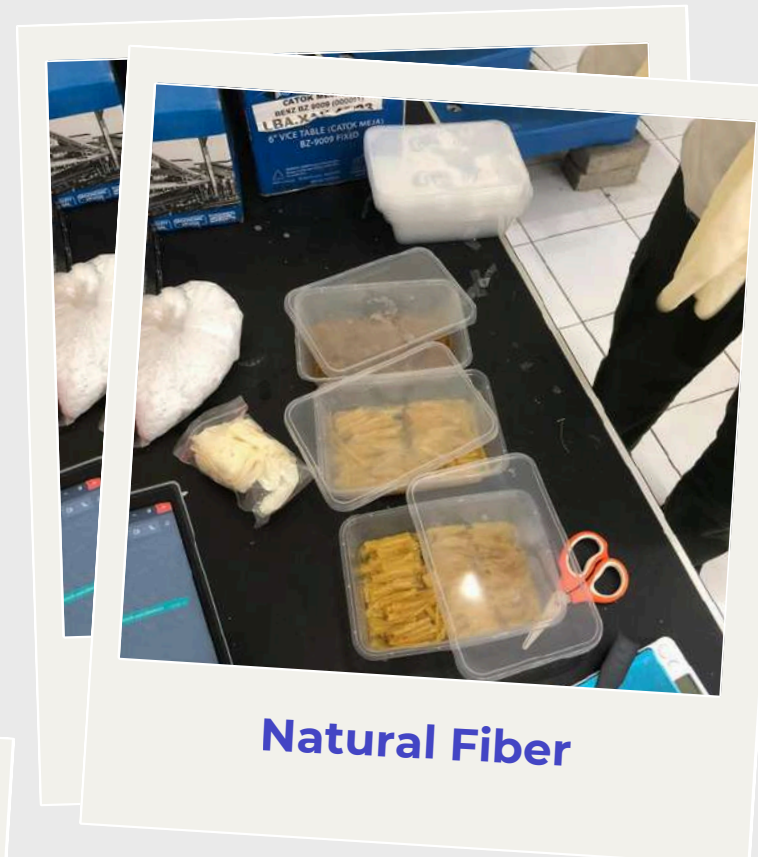

FTIR Test

#VOCATIONAL OUTBOND MOBILITY PROGRAMME

MAJOR ACCOMPLISHMENTS

3rd Place in Business Plan Competition

Vokasi Lomba Kretivitas (VOKALITAS) Faculty of Vocational Studies, Universitas Negeri Malang | May 2025

Funded Project Fast Market Day

Young Entrepreneurs For Inclusive And Resilient Economic Future, Faculty of Vocational Studies, Universitas Negeri Malang | August 2025

Finalist of ANCHOR

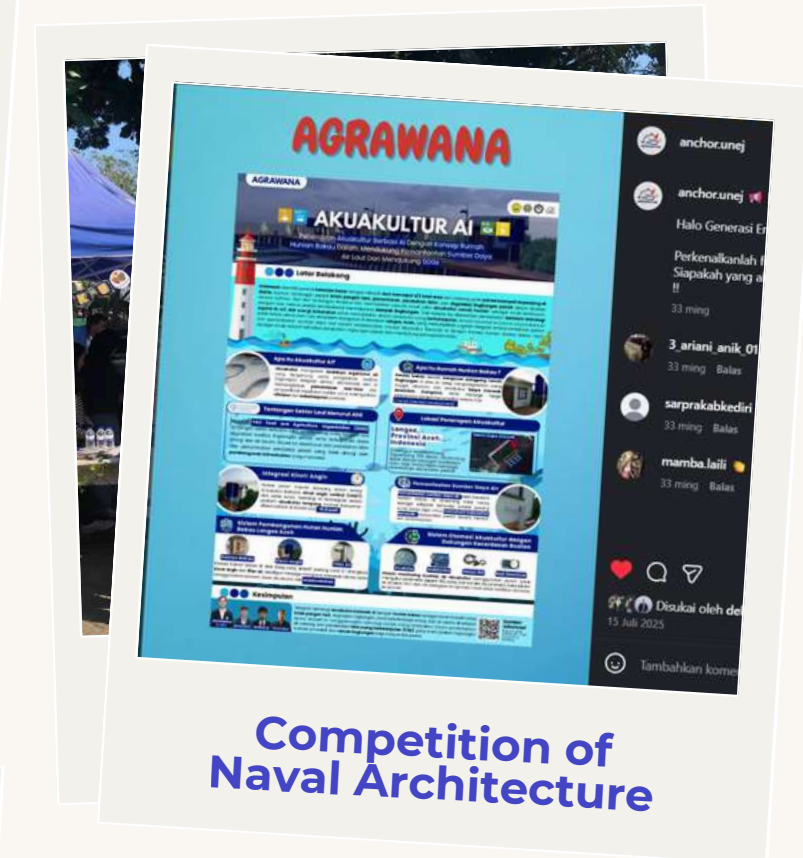

Annual Competition of Naval Architecture, Faculty of Engineering, Universitas Negeri Jember | July 2025

3rd Vocation Of Champion

Sustainable Innovative Product Category, Committee of Universitas Sebelas Maret | October 2025

2st Entrepreneur Day dan Achievement Week

Student Achievement Week Technology Category, Universitas Negeri Malang | December 2025

WORK EXPERIENCE

PT Astra Daihatsu Motor

● Logistic Planning Plant Administration Division 2021 - 2023

Responsible for planning material and non-material requirements based on production schedules and user requests, including inventory management to ensure stock availability. Monitored ordering processes, deliveries through the SAP system to ensure timely execution. Conducted data analysis and visualization using Microsoft Excel and Power BI to monitor production performance and support decision making.

● Warehouse Consumable Jun - Aug 2023

Perform GR and GI processes in SAP ERP, ensuring that orders and deliveries match. Provide logistics support to ensure efficient material flow and on-time delivery to customers.

Achivements and Award

1st Konvensi QCC SS Internal Divisi 35 2021

Reduced the lead time of the Special Order (SO) creation process by adding a document upload feature to the JIT System menu. This innovation reduces excessive manual processes, lowers workload, and improves efficiency in the SO creation process.

3rd Konvensi QCC SS Internal Divisi 37 2023

Make ADM as Smart and Green Manufacturing by developing a forecast distribution application for suppliers to prevent delays, reduce lead time and manual email workload, and minimize sending errors, resulting in a cost reduction of IDR 52.536 million per year.

Finalist of Konvensi CBI PT Astra Daihatsu Motor 2023

The CBI Competition using the design thinking method introduced the JUSCERIA program, which increased the I CARE Index from 57% (2020) to 86% (2023) to improve employee culture.

INTERNSHIP EXPERIENCE

WARSHIP DIVISION

Pipping Engineer Project Al- Maryah Ship

Feb - May 2026

Assisting in the GRE (composite) pipe fabrication process for the Al Maryah ship project starting from fit up, joining with lamination and CBCS methods, hydrotesting according to class procedures, as well as dividing work based on material classification, monitoring the progress of each manpower, and assisting in the installation process on the ship.

Identification Pipe

Marking Cutting

Fit Up
(CBCS & Lamination)

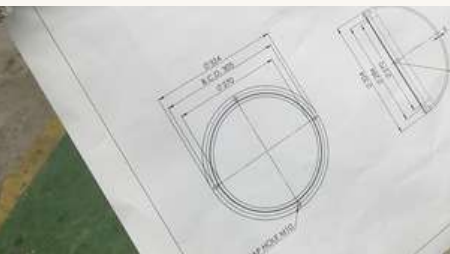

Hydrotest

Composite Above/Underwater Sensing Vessel Project

January 2026

Supporting the development of master models for underwater and surface sensing vessel projects, including the creation of master models of Piranha torpedoes using composite materials mixed with resin and fiber glass according to engineering drawings.

Working Plan

Master Pattern
Fabrication

Surface Fairing

Master Model

ORGANIZATIONAL EXPERIENCE

Student Executive Board

Head of the creative innovation division

Youth Entrepreneur Show

The flagship work program aims to improve students' skills and motivation, so that they are able to innovate and develop creativity in the field of entrepreneurship.

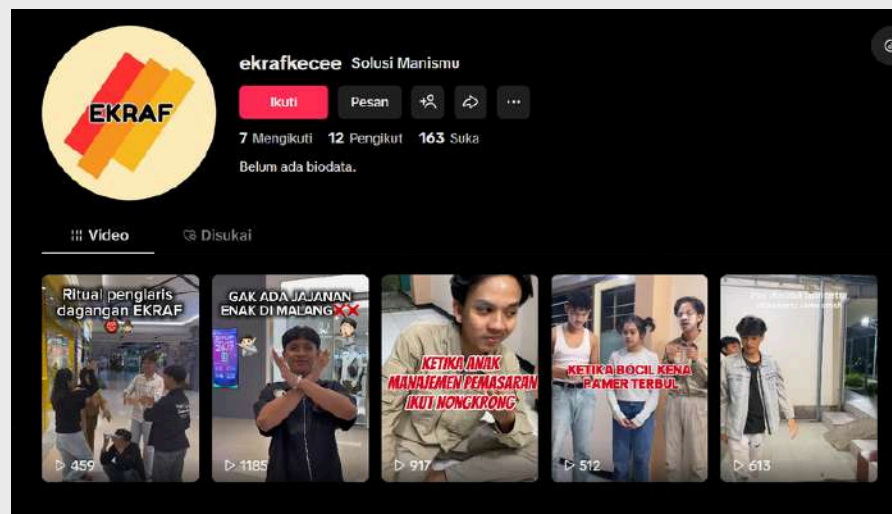

Media Merchvo

Activities to create information media for the Merch business (Vocational Merchandise)

Culinary Creative Economy Media

Activities to create information media for the Culinary Creative Economy business.

About Creative Innovation Division

The Creative Innovation Division focuses on developing innovative ideas in the creative economy, encouraging students to explore their potential while promoting education, information sharing, and collaboration with communities and industry to create new innovation opportunities.

PROFESSIONAL DEVELOPMENT PROGRAM

HOST COMMITTEE | LEADERSHIP EXPERIENCE | COMMUNITY SERVICE EXPERIENCE

Vocational Internal Cultural Camp

The Vocational Inter-Cultural Camp (VICC) is an international short course by the Faculty of Vocational, Universitas Negeri Malang, focusing on local culture, SDGs, and community engagement in Malang.

Commite VICC Programe **2024 - 2025**

- Event Logistics
- Participant Coordination
- Inventory Management
- Timeline Monitoring

Community Service SD Unggulan AL-YA'LU Malang

Project introduction activities from Al-Ya'lu Malang's Leading Elementary School supported by D4 Manufacturing Technology Engineering to encourage creativity and critical thinking through educational games.

Commite Community Service **May 2025**

- Program Execution
- Participant Coordination
- Program Implementation

International Design Competition (IDC) 2025

The International Design Competition is an international competition held by Malang State University to develop student creativity and innovation in the fields of design and engineering.

Chairman of the committee **Mar - May 2025**

- Decision Making
- Program Coordination
- Strategic Planning
- Event Supervision

Festival Inklusi Universitas Negeri Malang

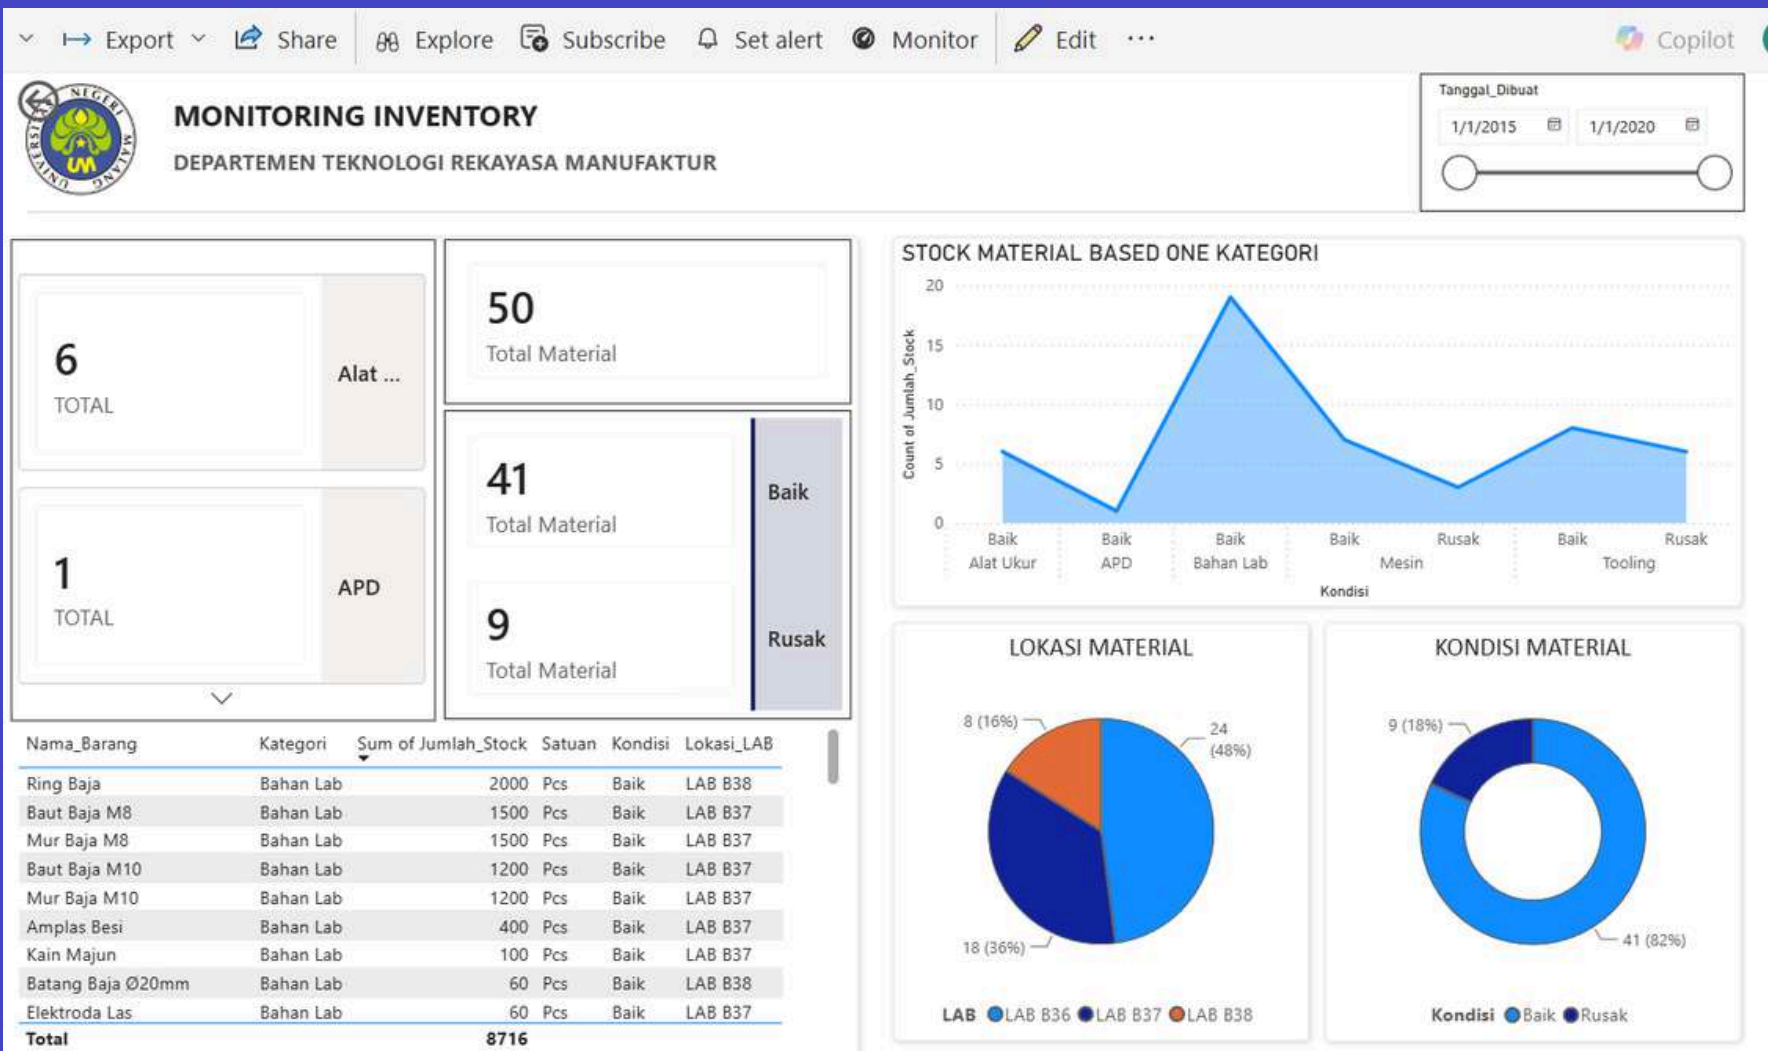

The Disability Festival is a platform to showcase the artwork, talents, and achievements of students and the disability community through exhibitions and performances, while also supporting inclusivity and diversity.

Commite Festival Inklusi **October 2025**

- Event Planning
- Technical Preparation
- Participant Coordination
- Timeline Monitoring

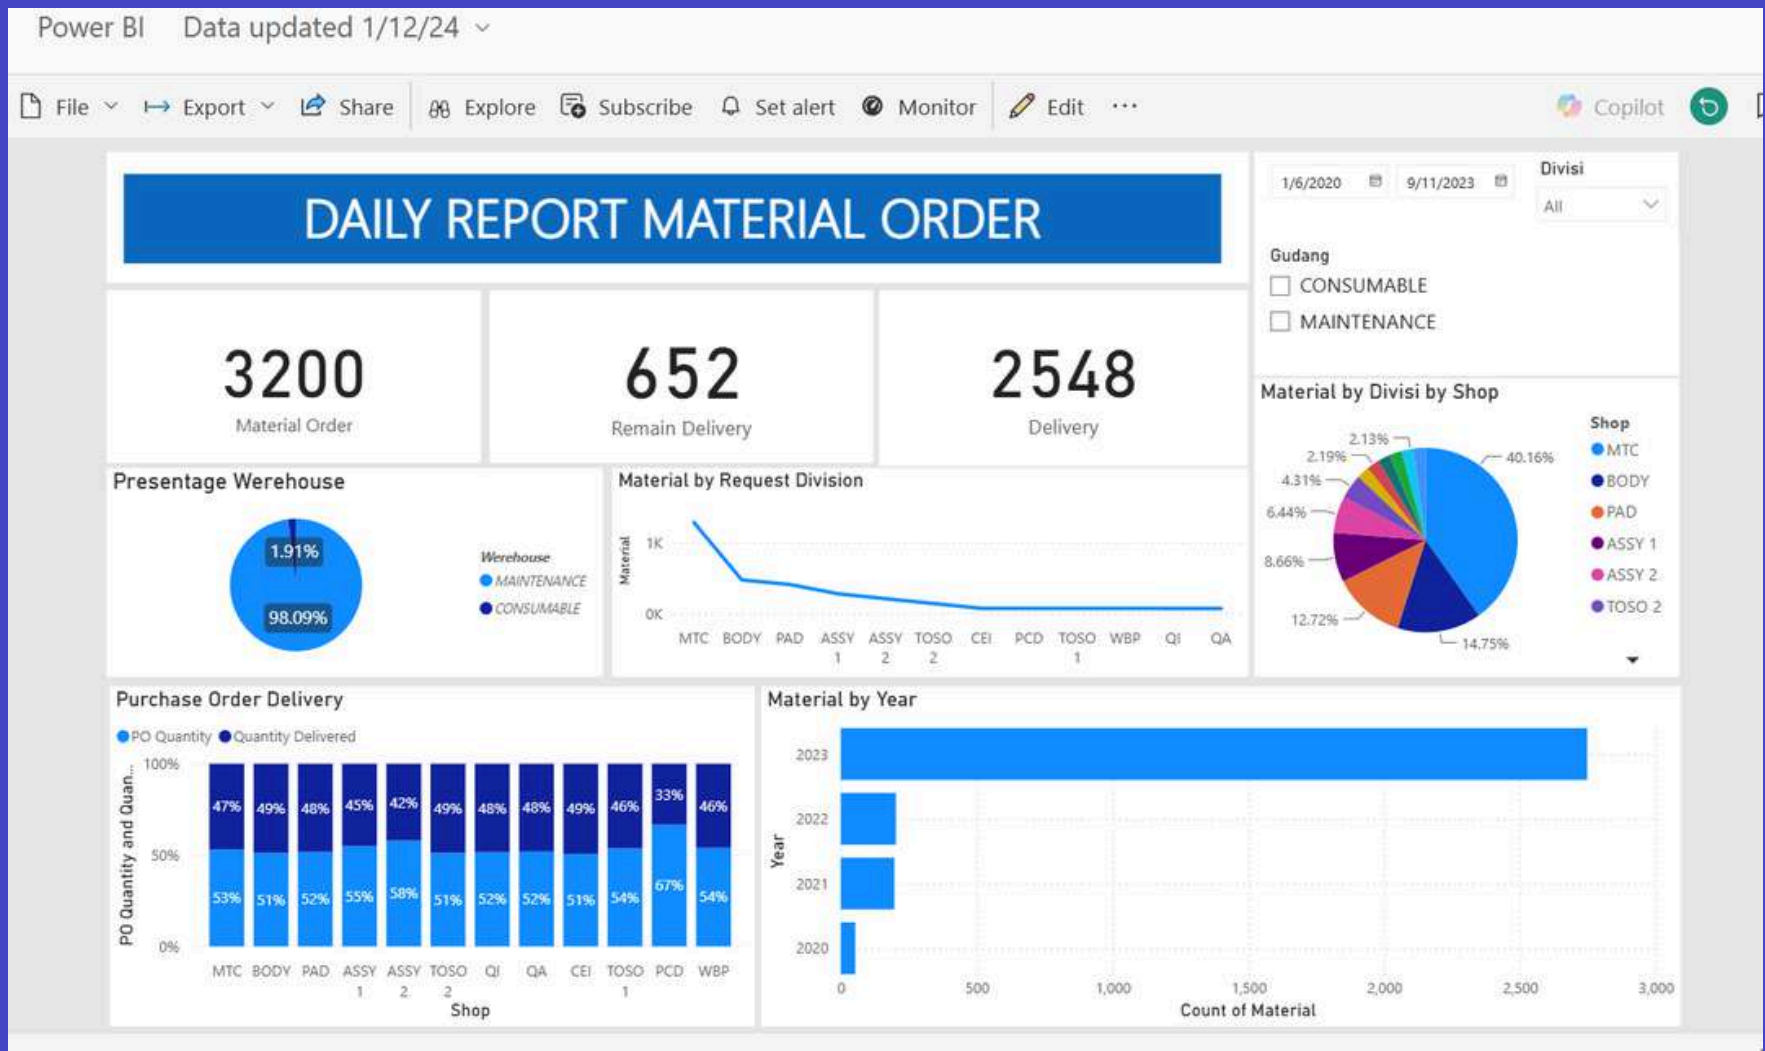

PROJECT DASHBOARD POWER BI

Monitoring Inventory | Daily Report Material Order

DASHBOARD MONITORING INVENTORY

The Inventory Monitoring Dashboard is designed to monitor the stock, condition, and location of lab inventory. The goal is to improve asset and material management efficiency. The application's target users are Lab Technicians/Toolmen, who monitor the tools and materials used by students.

DASHBOARD DAILY REPORT MATERIAL ORDER

This dashboard is designed to monitor the material ordering and delivery process, including order quantities, deliveries, shipments, and distribution of divisional requests. The goal is to improve procurement efficiency and material control. Target users include procurement, warehouse, PPIC, & operational management teams.
